

STAINLESS STEEL

Stainless Steel Transition Fittings and Adapters

CORROSION RESISTANT

Stainless Steel is not subject to the dezincification problems common in most Brass products.

STRONGER MATERIAL

Stainless Steel is field proven unlike many of the new Low-Lead Brasses.

CLEANER WATER

Stainless Steel does not contain Lead like most Brass does.

- 304 Stainless Steel is galvanically compatible with Brass and Copper in potable water plumbing systems.
- Complies with all Low-Lead plumbing laws.
- Will not leach hazardous materials.
- Code approved.

Certified to NSF-61

ASTM D2846
25-50 Flame & Smoke Rated (water filled)
